

## # 655 "M"

### Single Sided LOW DENSITY PVC Foam Tape

**DESCRIPTION**

A LOW density Closed Cell PVC foam tape coated on one side with a high performance acrylic adhesive on the other side a Mylar polyester film is laminated to provide a durable abrasion resistant outer surface. Excellent combination of flexibility and conformability with strength & wear resistance. Excellent weatherability & chemical resistance. It is a clean, waste free substitute for liquid sealants.

**APPLICATION**

- Major application: Vibration dampening, sealing, seaming, and/or gasketing.

**PHYSICAL PROPERTIES**

Foam	PVC
Density (Range)	6 - 9 lb. per cubic foot
Shore Hardness "00"	30
Thickness	1/8" and 1/4"
Force to Compress 25% (Range)	2.5 psi
Compression Deflection (Range)	1.5 psi
Tensile Strength	40 psi
Color	Black
Adhesive	Water Based Acrylic
Water Absorption (%)	9
Low Temperature Flex	No Cracking
Flammability	Self Extinguishing

Physical characteristics shown are averages from tests recommended by our own procedures. A particular roll may vary slightly from these averages. The buyer should determine the suitability for his own use.
