

Product Data Sheet

#214 ~ AV Cord Cloth Tape

DESCRIPTION

Multipurpose PE coated LOW GLOSS cloth tape. Strong cloth/film backing with matte finish and aggressive, yet highly cohesive adhesive allows for use in hold-down of AV cords and other materials in entertainment industry applications – while removing clean off most surfaces (*surface type and dwell time may affect performance*). Tape is conformable and offers excellent moisture and abrasion resistance. More economical than premium cloth gaffers' tape in applications where low gloss surface is allowed.

APPLICATIONS

- Non-reflective, Low cost Gaffers tape – wire, cord hold-down, prop attachment for stage productions, concerts, tradeshow, school plays, etc.
- Marking stages – “spike” tape.
- Used in Photography studios to protect and hold wires.
- Patching and repair of synthetic fabrics (i.e. seat repair)
- General industrial applications for bundling and sealing where hearty, clean removal adhesive and strong tape properties are key

PHYSICAL PROPERTIES

Color	Matte Black
Backing	PE coated PET/Cotton Cloth
Adhesive	Natural Rubber w/ Synthetic Resin
Thickness	11.8 mils
Tensile strength	31.4 lb/in
Adhesion to Steel	43 oz/in
Ball Tack to Steel	Ball No. 22
Elongation at Break	10 %

Recommended Storage Conditions: 40-60% Humidity, 60°F-80°F
Standard Shelf Life (at 25C): 36 months from date of manufacture.

The physical and performance characteristics shown are averages obtained from tests recommended by ASTM, government agencies or our own procedures. A particular roll may vary slightly from these averages and it is recommended that the purchaser determine the suitability for his own purpose.
