

254 Industrial Masking Tape

DESCRIPTION

Mid Grade creped paper tape suitable for medium duty masking, bundling and holding under a wide range of conditions. Natural rubber adhesive is slightly cured and designed for performance under variety of conditions: heat / bake cycles up to 203°F and exposure to most solvent-based paints. *Client must determine suitability of #254 masking for their specific requirements and application.*

FEATURES

- Crepe paper backing, rubber impregnated for strength and durability. Higher elongation characteristics for improved masking features on curved surfaces. High tack, natural rubber adhesive engineered for good adhesion to diverse surfaces.
- Tape has a good shelf life, resists water, solvents and oil and has ultraviolet resistors, which stabilize the product and prevent degradation.

PHYSICAL PROPERTIES

Color	Natural
Thickness	5.6 mils
Elongation	10 %
Tensile Strength	20 lbs. / in.
Adhesion to Stainless Steel	32 oz. / in.
Application Temperature Range	32°F to 203°F

The physical and performance characteristics shown are averages obtained from tests recommended by ASTM, government agencies or our own procedures. A particular roll may vary slightly from these averages and it is recommended that the purchaser determine the suitability for his own purpose.
