

655PVC

Single Sided LOW DENSITY PVC Foam Tape

DESCRIPTION

A LOW density Closed Cell PVC foam tape coated on one side with a high performance acrylic adhesive on the other side. Carried on a siliconized paper liner. Excellent combination of flexibility and conformability with strength & wear resistance. Excellent weatherability & chemical resistance. It is a clean, waste free substitute for liquid sealants.

APPLICATION

- Major application: Vibration dampening, sealing, seaming, and/or gasketing.

PHYSICAL PROPERTIES

Foam	PVC
Density (Range)	6 - 9 lb. per cubic foot
Shore Hardness "00"	30
Thickness	various (from 1/16" through 3/4")
Force to Compress 25% (Range)	2.5 psi
Compression Deflection (Range)	1.5 psi
Tensile Strength	40 psi
Color	Black
Adhesive	Water Based Acrylic
Water Absorption (%)	9
Low Temperature Flex	No Cracking
Flammability	Self Extinguishing
	Fire resistant per FMVSS 302

Physical characteristics shown are averages from tests recommended by our own procedures. A particular roll may vary slightly from these averages. The buyer should determine the suitability for his own use.
